

## ▲ **MODEL: RC1000** CONVEYOR SYSTEM

The Pizzamatic conveyor system model RC1000 is specifically designed to handle a food product such as shredded cheese. The machine frame is cantilevered and the product containment hoppers are removable so that the product belt can be easily removed without the use of tools for complete sanitation. The conveyor belt is positively tracked for easy and continuous alignment. The conveyor can easily be incorporated as a 3 belt return system for a waterfall product applicator (as shown above).

### **FEATURES:**

- Heavy Duty Stainless Steel Construction
- Easy And Complete Sanitation
- Conveyor Casters Are Height Adjustable
- USDA Compliant
- CE Approved

### **SPECIFICATIONS:**

**Electrical Requirements:** 240 volts, 3 phase
